NUMBER OF COMBINATIONS LEADING TO A PRODUCT Problem Statement:	×22812AA
Problem Statement:	62 72
You are given an array arr and a product m. Your task is to find the number of possible unique triplets whose product of	(OV)
elements is m. Input Format:	BIZANE
• The encound line contains angest congreted integers of the error orr	
The second line contains space separated integers of the array, and The third line contains the product m. The input will be read from the STDIN by the candidate	, AOZ TO
Output Format:	40
The output consists of a single integer, i.e. the count of unique triplets having product m. The output will be matched to the candidate's output printed on the STDOUT	
The output will be matched to the candidate's output printed on the STDOUT	0812AN
